

Embellish your moment

HAK-100 hot foil printer

www.brother.de/hak

Unleash your creativity

Immerse yourself in a world in which the possibilities of customisation are open to you – a world away from mass production. The HAK-100 fulfils the need for more exclusivity with elegant foils in a wide range of colours.

Give your prints a personal touch with the HAK-100. Design glamorous wedding stationery, greeting cards, certificates, documents or business cards that reflect your individuality. Send customised greeting cards that come from the heart. Create refined menu cards that whet the appetite for more. And even in times of farewell, you can express your deep connection with dignified and customised funeral stationery.

Compact yet powerful, HAK-100 is your tool for high-quality messages.

Overhead foil finished with copper foil – HFA220CP

Design the perfect wedding stationery

Every little detail is important when it comes to organising your dream wedding. Design your customised wedding stationery according to your own ideas – from elegant invitations to enchanting place cards and thank you notes, the HAK-100 hot foil printer allows you to add your own personal touch.

Make a glamorous impression on your guests with refined, unique pieces that reflect your unique style.

Make every occasion special

What could be nicer than receiving a warm greeting card? With the HAK-100 you can go beyond standard cards and create personalised greetings that will warm the hearts of your loved ones. From birthdays and anniversaries to public holidays and special milestones, the hot foil printer offers endless possibilities.

Customise and embellish cards thanks to the compact product design and user-friendly handling.

The art of elegance at the dining table

Impress your guests from the moment they take their seats with refined menus that radiate sophistication and professionalism. Create menu cards that not only showcase your culinary offerings, but also reflect the style and atmosphere of your establishment. The HAK-100 is the tool with which you can effortlessly add decorative elements, glossy logos and texts or artistic illustrations to your menus.

Be it an elegant restaurant, a trendy café or a catering company – create an atmosphere that will delight your guests.

Increase your professional potential

Do you value exclusivity and high-quality workmanship, even for the smallest print runs? The HAK-100 hot foil printer allows you to take the design of your professional image into your own hands.

Create attractive business cards, certificates or business stationery that make a professional impression on your business partners.

Smooth paper finished with silver foil – HFA220SL

Make your brand shine

Perfect for short runs, the HAK-100 allows you to create impressively finished labels. Be it wine bottle or delicatessen labels, the hot foil printer offers a high degree of versatility and prints a wide variety of label sizes and shapes up to a maximum width of 210mm.

Easily refine your own designs with precise foiling in many colours – whether complex patterns, logos or individual metallic accents.

Label finished with red foil – HFA220RC

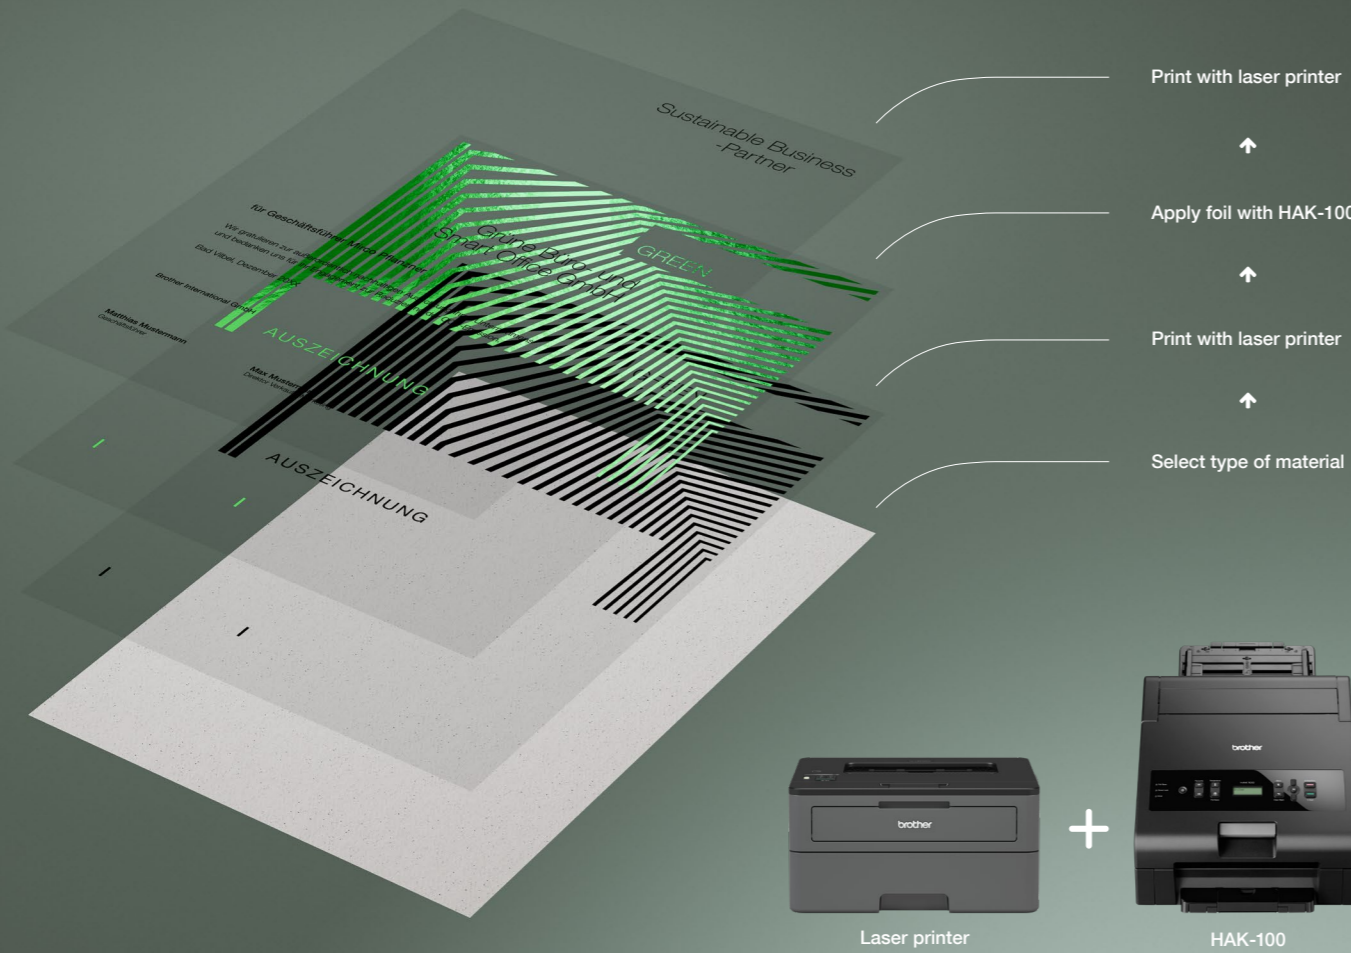

Create lasting dignified memories

In times of loss, we remember our loved ones. Create elegant mourning stationery and satinised textile ribbons. You can also create high quality funeral stationery such as a memorial programme, condolence and thank you cards with the HAK-100 to create lasting memories.

Textile ribbon finished with copper foil – HFA220CP

How the HAK-100 hot foil printer works

- 1. Print your own design with laser printer**
 Print your own design on a laser printer. You can use your favourite design software. The best wrapping results are achieved with 100% colour application (ideally black).
 - 2. Set the temperature and feeding speed**
 Set the temperature and print speed on the appliance. A higher temperature and slower speed are ideal for thicker materials; for thinner materials and higher productivity, select a lower temperature and faster speed.
 - 3. Put applications on HAK-100 and start transferring**
 Place your printouts face down in the HAK-100's automatic document feeder (ADF) and start the finishing process.
- You can place up to 44 sheets of 90g/m² or up to 12 sheets of 350g/m² in the automatic document feeder (ADF).
