

REACH – Réglementation Chimique

Mars 2023

Directive REACH : n° 1907/2006 concernant l'enregistrement, l'évaluation, l'autorisation et les restrictions applicables aux substances chimiques

REACH exige des fournisseurs, d'informer leurs destinataires et utilisateurs si un produit reçu contient plus de 0,1% (du poids de l'article) d'une substance candidate à la liste des SVHC (Substances of Very High Concern = Substances extrêmement préoccupantes).

Le tableaux suivants fait référence aux 224 SVHC REACH mises à jour par l'ECHA le **10 Juin 2022**.
(<http://echa.europa.eu/candidate-list-table>)

Ce tableau dresse la liste des produits Brother dont un article contient une SVHC à une concentration supérieure à 0,1% du poids de celui-ci. Les informations détaillées sont disponibles dans la base de données SCIP de l'ECHA. (<https://echa.europa.eu/fr/scip-database>)

Le guide utilisateur de la base de données SCIP est accessible en cliquant sur l'icône 

La base de données SCIP peut être consultée à l'aide de l'**IDENTIFIANT DE L'ARTICLE** ou du nom général du produit indiqué ci-dessous. Si plusieurs produits sont affichés, veuillez sélectionner le modèle approprié en tenant compte de la région dans laquelle vous avez acheté le produit.
