

Brother Nordic A/S in Denmark is the head office for the Nordic sales companies of the Brother Group.

***The Brother Group shall positively and continuously act to decrease the environmental impact of all aspects of our business operations so that society can achieve sustainable development.***

***Environmental strategic management is an integral part of our business and we strive to make continual improvements, such as improve our energy efficiency, minimize our CO<sub>2</sub> footprint, purchasing environmental labelled products where possible, and improve recycle waste to protect and preserve the environment.***

To minimise our impact on the environment we have adopted the International Environmental Management System ISO 14001. Working within this framework and applying Brother's own 5R concepts, we will continuously evaluate and improve our environmental performance and try to meet the needs and expectations of our stakeholders.

All Brother Nordic companies will operate within the environmental legislation of European Union and local laws and regulations and will continuously monitor such legislation.

Our producer responsibility awareness ensures that safety and environmental impact are prime considerations at every stage of our products' lifecycles, from design through to manufacturing and disposal at end of life.
