

# Secure Print+

Secure Print+ is a print management solution which helps businesses improve print security by protecting important documents. This confidential document sending and retrieving software creates a pull printing system to print documents securely when an external server isn't available.

## Authentication

Printers with an integrated Near-Field Communication (NFC) card reader or an LCD touchscreen, allow print jobs to be released by the authenticated user, making sure confidential data doesn't fall into the wrong hands.

Secure Print+ enables an NFC ID card to be configured so users can 'tap their ID card and release the print job from a specific printer. Specific user profiles can also be created giving access to all or some of the printer functions.

## Data

Data is temporarily stored in the printer memory until the user releases the document by NFC card or password. Once printed, the data is deleted. The length of time your data is stored in the printer is set to your specific requirements. If your data is left longer than the specified length of time, it is automatically deleted for your security.

## Benefits

- Confidential documents are only printed securely when the user is present
- Only authorised users can collect their documents
- Sensitive information is not sat on the printer for anyone to find
- Documents are held within the printer mitigating the risk of documents being lost
- Up to 200 users can be added

## Supported software:

Client OS - Mac OS Catalina - Windows 7®, Windows 8.1®, Windows® 10 Server OS - Windows Server® 2008 R2, Windows Server® 2012, Windows Server® 2012 R2, Windows Server® 2016

## Available on selected Brother solutions-enabled devices:

HL-L6300DW(T)	MFC-L9570CDW(T)
HL-L6400DW(T)	HL-J6000DW
DCP-L6600DW	HL-J6100DW
MFC-L6800DW(T)	MFC-J5945DW
MFC-L6900DW(T)	MFC-J6945DW
HL-L8360CDW	MFC-J6947DW
MFC-L8900CDW	
HL-L9310CDW(T)
