

# Brother Warehouse Labelling

# Maximise productivity

Are you looking for an alternative to your existing warehouse printers? Or solutions for a new site? Then you have come to the right place. Explore the range of Brother label printers and how they can support your labelling needs, no matter the size of the warehouse.

We understand that disturbed workflows and damaged barcodes are costly and time consuming. For your warehouse, we offer reliable printers, that will minimise downtime and increase efficiency.

For every task in the process, from receiving to shipping the goods, we have the right printer for you:

**Receiving**

**Storing**

**Picking**

**Shipping**

Explore which printer, we recommend for each step of the process and the reasons why you will not regret implementing a Brother solution.

# Why Brother for warehouse labelling?

## A printer for every need

We have a label printer for every task. Regardless of print volume and if mobile or stationary – the range of mobile, desktop and industrial label printers can fulfil your printing requirements.

## Ease of integration

No need to worry about integration, the label printers support various printer command languages, including ZPL2 emulation. This makes replacing old printers an easy plug & play task.

## "At your side"

Brother support is one-of-kind, we are at your side when you need us. We are happy to listen to your needs and cooperate with our resellers to offer you the best support and service. No matter if before, during or after purchasing a Brother products.

## Proof of concept printers

To convince you of the outstanding performance of our products, we offer a proof of concept printer including supplies for testing and evaluation purposes. This way we can identify your needs early on and ensure the needed integration.

## We are the print experts

Brother has been innovating and developing labelling machines for over 30 years, always with the focus of making processes more efficient. Our offering of document printers, multifunctional printers and even scanners allows us to confidently call ourselves the print experts.

## The right partners

In order to be able to provide the needed compatibility for warehouse labelling, we have partnered up. This means we can offer the commonly used Label Design Software, integration with ERP systems and hand scanners and make the implementation seamless:

**SAP® Member Gold**  
Printer Vendor Program

**BarTender®**

# 3 YEAR WARRANTY

## Let us maximise productivity

We offer an outstanding 3 years warranty on all our label printers, simply because we believe in our products.

For even more security, we offer enhanced warranties, making it possible to prolong the warranty up to 5 years.

# Mobile label printers

Mobile label printers are perfect for labelling on the go. They come in handy for receiving, storing and picking processes. Storing and picking labels are examples of applications that make sense to print on the spot instead of in the back office. This way you can optimise the workflow and save time and money.

Mobile printers come in 3 different sizes making it possible to print the exact label size needed. They are robust and ruggedized with a drop height of up to 2.5m. They can handle being handled.

No matter if placed on-body or fixed on the forklift, the RJ series are developed for quick labelling tasks on the spot.

## RJ

Receiving

Storing

Picking

### RJ Series – key features\*

- ✓ Direct thermal print technology
- ✓ Label width: 25 mm – 118 mm
- ✓ Print speed up to 152 mm/sec
- ✓ Print resolution up to 300 dpi
- ✓ Max. roll diameter: 66 mm
- ✓ USB, USB Host, Bluetooth and Wi-Fi interfaces
- ✓ Range of accessories available: rechargeable batteries, smart batteries, AC and car adapters, battery eliminator kits, charging cradle, car mount, shoulder strap and platen roller.

# Desktop label printers

Receiving

Shipping

## TD

The desktop label printers are optimised for mid-volume printing – they can easily print hundreds of labels per day. The printers are the perfect for printing shipping labels regardless of the service provider e.g. DHL or GLS.

Our printers come with two different print technologies: Direct thermal and thermal transfer. Direct thermal are for the labels with a shorter lifespan. Thermal transfer comes in handy, when the label will be exposed to harsh environments or the label life span expectations are higher.

Brother's high specification desktop label printers bring you improved operational efficiency with easy to use, high speed and continuous label printing. Combined with seamless integration and modular design, print from virtually anywhere in the workplace.

### TD Series – key features\*

- ✓ Direct thermal and thermal transfer print technology
- ✓ Label width: 19mm – 118mm
- ✓ Print speed up to 203mm/sec
- ✓ Print resolution up to 300dpi
- ✓ Max. roll diameter: 127mm
- ✓ Ribbon capacity up to 300m
- ✓ USB, USB Host, Serial, LAN, Bluetooth and Wi-Fi connectivity
- ✓ RFID technology
- ✓ Peeler and cutter for improved efficiency (optional)
- ✓ Platen roller and print heads for TD-4D available as accessories

# Industrial label printers

## Receiving

## Shipping

Industrial label printers are optimised for high-volume printing – they can easily print thousands of labels per day. The printers are perfect for printing pallet labels for incoming goods and shipping labels for the outgoing goods.

When it comes to high efficiency, the print speed of an industrial printer is key. Furthermore the high ribbon capacity ensures more time spent on printing than changing supplies. Time saved can be spent focusing on the job and working more efficiently – saving money in the long-term.

Fast print speeds help you keep up with increasing demand, especially when scaling up for peak periods. With an internal rewinder on selected models, you can also multi-task by sending your labels to print and collecting the ready printed label roll whenever required.

A wide range of models with different display options ensure ease of use and an outstanding customer experience.

# TJ

### TJ Series – key features\*

- ✓ Direct thermal and thermal transfer print technology
- ✓ Label width: 20mm – 114mm
- ✓ Print speed up to 356mm/sec
- ✓ Print resolution up to 300dpi
- ✓ Max. roll diameter: 203mm
- ✓ Ribbon capacity up to 600m
- ✓ Internal label rewinder
- ✓ USB, USB Host, Serial, LAN, Bluetooth and Wi-Fi connectivity
- ✓ Cutter and peeler (with rewinder) for improved efficiency (optional)

## Every size you need

Brothers range of supplies covers the most common sizes within the warehouse applications:

- Picking label
- Shipping label
- Pallet label
- Shelf label
- Caution label
- Compliance label
- Quality control label
- Custom label

Our supplies range for the thermal transfer printers includes coated and uncoated label options in variable lengths. For thermal transfer a ribbon is also needed: our black ribbons come in a range of widths and lengths. They are also available in a variety of standard or premium wax and resin ribbons.

### Let's make it for you

Should you not be able to find the appropriate label size in our portfolio, then do not hesitate to contact us. We are happy to listen to your needs and see if we can develop the label that meets your requirements.

# Accessories

## Upgrade your solution

Brother has designed and engineered a wide range of accessories to help customise the solution to meet your specific warehouse labelling requirements. The smart battery for mobile printers and cutter and peeler for desktop and industrial printers are extra helpful and worth highlighting.

### Smart battery

Detects battery usage and provides the data to report the health of the battery. That means your RJ-4 mobile printer can last longer, printing labels on a single battery charge that last the whole shift.

### Cutter

When using a continuous roll with your Brother desktop or industrial label printer, you can print any size to fit your needs. By automatically cutting labels as they are printed, a clean cut and ease of use is ensured.

### Peeler with liner rewinder

Tired of the long liners when printing? For selected industrial printers, we offer a peeler option including liner rewinder. This way efficiency and a clean working area is ensured.

## “At your side”-support globally and locally

Warehouses across different countries? No problem. Brother is a global company with offices in 44 countries. This way, we can make sure that your customer is always provided the local support needed.
