# Outstanding A3 colour printing without compromise

Our business inkjet range delivers superior A3 colour printing that packs a punch. With low energy consumption, you can be assured your carbon footprint is moving in the right direction.

This range of business inkjets come with specific tools and features together with high-yield cartridges to help you manage costs without compromising on quality.

Boasting a leading first page print out time of under 5 seconds[2] and print speeds up to 30ipm[1], you're never held up waiting for documents to be printed. Flexible media handing capabilities and paper capacity of up to 750 sheets[6] keeps your business moving with minimal interruption. All models support full colour printing up to A3 with the option of A3 copy and scan.

With the large format device, easily print banners, posters, panoramic photos and promotional signage and automatically cut to the required length.

Add to that print management solutions, robust security features that keep your company protected, and multiple connectivity options, and you have a suite of printers that don't just keep up with your business, but keep it running at its best.

Secure, impactful A3 colour printing you can rely on

Create impactful documents that stand out.

The newly developed full-pigment ink brings your documents to life with vibrant and sharp images. Using the optimal combination of colour ingredients, you can be confident that your documents are water, smear and fade resistant.

Work without interruption

We understand the frustration caused by unreliable technology and the knock-on effect it often has on the rest of your business. That's why this business inkjet range has been designed with durability in mind. A redesigned print head and increased engine life mean you can be confident your printer will keep on printing for as long as you need it to.

Built-in security features

Be confident that your business documents are secure with professional security features available as standard. Built-in features such as IPsec support and access control, conforming to IEEE 802.1x standards, help to keep your network protected. Intrusion detection enables devices to constantly monitor and automatically recognise attacks, taking preventative measures to protect against the threat of hacking.

End-to-end encryption allows you to connect and share documents with confidence with secure document sharing via SFTP. Data is encrypted and password protected via SSL when it is transferred, meaning anyone trying to capture it will not be able to read it as all the data will be encrypted.

Page gauge

Be confident you will not be caught out with no ink when you need it most. You have complete visibility on how much ink is left in your cartridges with our unique page gauge counter. In addition, the transparent ink cartridge design also allows you to see how much ink is left, giving reassurance of when the inks need to be replaced, and avoiding changing supplies too early.
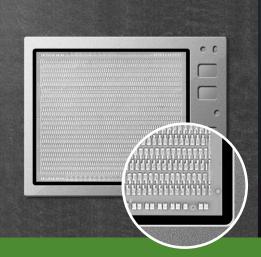

Redefining printing technology

Powerful next generation, high density printing

Through years of meticulous engineering design, our engineers have worked tirelessly to redefine our inkjet core technology. Striving to create more precise, durable components, to enhance print speed and extend machine life.
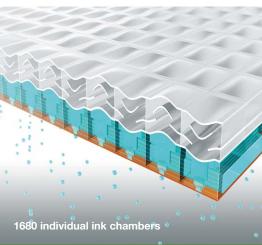

Brother's patented MAXIDRIVE print chip utilises a unique dual transformational piezoelectric system that emits ink at high-power.

MAXIDRIVE print chip delivers ultra-fast, durable, premium quality colour printing. Individual ink droplets are provided via 40 micrometer thick film, ejected through 1680 individual chambers across a single print chip.

40μm Piezoelectric element

1680 individual ink chambers

Enhanced print quality

Each chip carries 1,680 pressure chambers where ink droplets are discharged.

More durable

Up to 200% more prints in a lifetime. Piezoelectric element engineered to change shape upwards and downwards.△

Increased print speed

High speed injection, up to 150% faster with advanced droplet control.△, ◊

△ Compared to Brother conventional model
◊ Only on selected models for colour printing

MFC-J6955DW

Compact, yet truly versatile large format printer

Open up endless possibilities with this compact large format printer.

The ideal device for premium A3/A4 printing and scanning, with the added option of printing on roll paper with the MFC-J6959DW.

Space-saving design

Its compact, un-intrusive design gives you the flexibility to place it anywhere in your office. The roll paper sits discreetly inside the paper-tray keeping your workspace organised and clutter free.

Hassle free finish

Easily print professionally finished banners, posters, panoramic photos and promotional signage without borders and automatically cut to the precise length you need.

Flexible long format printing

Easily print up to 2700mm from the roll paper in the lower tray, when not printing on large format roll paper, simply replace with 500 sheets of A4 paper and let the printer keep on printing.

Multifunction device

Save time with this truly multifunctional printer. Easily print, scan, copy and fax from a single device, which delivers high-quality professional results every time.

3 months free trial of Shoppa Go
with the MFC-J6959DW

Partnering with Shoppa - A market leading signage solutions provider, Shoppa Go gives you the ability to easily create and customise banners, posters and signage with a range of tools and features, including:

- **Pre-made, ready-to-use templates**
- **Custom templates and formats**
- **Simple drag, drop and image modification**

Contract printing that looks after itself

Managed Print Services (MPS) enable you to get the best out of your devices, and eliminate the burden of day-to-day management of your print fleet. That's why each printer has been designed with MPS in mind.

Don't be left without your printer when you need it most

We promise you total peace of mind with Brother's Managed Print Services (MPS). Never run out of ink again, as we will order and deliver your supplies just when you need them, reducing downtime and maximising productivity. You can also be in full control of your print, by tracking usage while keeping an eye on print-related costs.

We understand that in business every second counts, and with our break and fix options, your machine will let us know when it needs repairing meaning we can respond quickly and reduce any downtime.

Get inks delivered straight to your door

Never run out of ink again with our Managed Print Service (MPS). We'll take care of the ordering, delivery and even recycling of your old ink cartridges, meaning you can spend your time on running your business.

No worrying about spending

We know that visibility is key when it comes to budgeting for print. With our intuitive online portal, you can find a full breakdown of all your costs, as well as reporting on the way you spend. So you can stay on top of your usage at all times.

No waiting for repairs

Our 'At Your Side' support means you don't have to deal with long periods of downtime. We'll respond quickly to any faults and provide professional support, so any impact on your business is kept to a minimum.

MPS is not available for MFC-J6959DW.

COOL EARTH

We take our environmental responsibilities seriously and encourage our customers to do the same by returning used Brother ink cartridges to us at no cost. We have a zero waste to landfill policy for these returns and ensure empty cartridges are ethically recycled.

To complement our recycling promise, we have been partners with Cool Earth, for over a decade. Together we back local people to protect rainforest from deforestation. So far working with our customers.

Brother and Cool Earth have supported seven communities in the rainforests of Papua New Guinea and the Peruvian Amazon empowering them to be custodians of over 70,000 hectares of rainforest, 23,305,975 trees and over 37 million tonnes of carbon stores.
