

# Brother P-touch system

## - Professional labelling made easy

For every business keen to maximise its speed and efficiency, innovative systems leading to better organisation are vital.

Clear labelling is a priority and allows for quick and easy identification of all kinds of items in a diverse range of office and industrial environments.

The P-touch electronic labelling system from Brother delivers professional labelling solutions to businesses all over the world and includes a comprehensive choice of electronic labelling systems to meet every identification requirement.

P-touch systems are quick and easy to use and produce high quality printed labels in a variety of sizes and colour combinations. Using Brother's unique, patented TZ-tapes, the systems stand up to the challenges of even the toughest working environments with labels proven to withstand heavy abrasion, electrical resistance and exposure to chemicals, sun, water and extreme temperatures.

These are fast, effective and versatile solutions that address all your identification needs. With the P-touch system at your side, the advantages of professional labelling instantly bring their benefits to your business.

The solution is clear - P-touch from Brother.

### **P-touch 3600**
