

**Power your  
business with  
the latest in  
mono laser print  
technology.**

**Professional  
award-winning  
mono laser  
printers just  
got better.**

**Our most advanced mono laser technology is guaranteed to deliver quality printing every time.**

Designed to deliver professional performance, with high-speed, high-quality printing you can rely on. Our latest mono laser printer range comes with up-to-date industry-standard security features and the flexibility to tailor the device to suit you and your business.

# Performance engineered

With its high-speed, premium-quality printing and outstanding durability, you can be confident that your device will keep on performing to the highest standard - giving you and your business the best results, time after time.

## Enterprise level scanning

With leading 2-sided scanning speeds of up to 100ipm (images per minute), physical documents are easily transformed into digital files with precision, clarity and speed.

## Super-fast printing

Print large volumes of documents in the shortest time. Printing up to 50ppm (pages per minute) and a first print out time of less than 6.7 secs, you will never have a long wait for your documents to be printed.

## User-friendly

Make the most of your office space with this highly productive multifunctional device. Ideal for high-volume users, this intelligent device is designed to deliver a user-friendly, professional experience with exceptional printing that your business can depend on.

# Secure by design

To keep pace with the ever-evolving legislation on privacy and data security, our devices offer the latest industry-standard security features to securely protect your data.

At Brother we put print security first. All our products are 'secure as standard' - using triple-layer security at a network, device and document level, with a range of robust features that means data is only ever seen by those it is meant for.

With businesses shifting towards Zero Trust environments, we know that security is your highest priority. The evolving nature of security means that our security experts continuously research new enhancements to products, solutions and services to proactively ensure all our products are secure by design.

Our professional mono laser range provides business level security verified through external security certification, offering added peace of mind that your documents remain safe and secure. All devices come with a flexible suite of security features and solutions that can be tailored to your business, enabling you to easily audit, control and manage your fleet of devices securely.

**All devices come with a flexible suite of security features and solutions that can be tailored to your business**

Your device protects your business by reducing its attack surface through:

#### **Restricting user access**

by using LDAPS, Windows Active Directory together with NFC authentication, only authorised users are able to access the device.

#### **Restricting privileges at a device level**

with Secure Function Lock and Setting Lock, only authorised users are permitted access to specific functions.

#### **Maintaining device integrity**

with runtime intrusion detection, Secure Boot, digitally signed firmware and end-to-end encrypted connections, devices are always performing at their optimum level of security.

Your network is protected with flexible industry standard features and management tools including:

**Intrusion protection** - with protocol management, interface restrictions and IPV4 filtering, you have the flexibility to adapt device settings to your business.

**Secure connection** - securely connect to enterprise level wired and wireless networks through industry standard IEEE 802.1X.

**Secure encrypted communication** - by using flexible industry standards such as TLS, SSH, IPSEC, HTTPS and SNMP3, your business can tailor the device to its network.

**Easily manage and configure your security profile** - using Device Master Settings, BRAdmin Pro 4 and Mass Deployment Tool, your business can apply settings to entire fleets of devices.

**Audit your devices** - using SIEM integration through Syslog, you can gather real time usage information on your devices.

Your documents are protected through encryption, storage protection and secure print solutions including:

**Encrypted document transfer** - when you send your print data from your computer to the device, IPPS/HTTPS encryption ensures your data is secure and unreadable.

**Secure scan data transfer** - whether you are scanning to your local network or over the internet via Web Connect or a cloud-based service, your data is protected using TLS, HTTPS, SFTP (SSH).

**Non-persistent internal memory** - all print job data is automatically wiped during a reboot and data is purged, ensuring no information is left on the device.

**Secure print release** - using a Brother secure print solution, documents are only released when you are ready to print and collect them.

**3rd party integration** - through Brother Solutions Interface (BSI), our devices can be fully integrated with trusted 3rd party partners such as Kofax and YSoft, which adds an extra layer of security to your business.

## Solutions ready

Automate workflows and improve business processes and security with print management solutions.

Brother offers a suite of document management, security and workflow solutions which can be added to devices. These provide additional professional features to improve your business processes.

**Complete flexibility in how you manage, secure and control your documents.**

# Unlock new possibilities

## Workflow Solutions

### Personalised touchscreen

Improve efficiency by making frequently used functions more accessible by showing and hiding specific shortcuts. Simply log in to the device and have your individual user based shortcuts on the home screen.

### Barcode printing

With Barcode Print+, simply supply your printer with the information for the barcode. The printed 2D and 3D barcode is easily read by a variety of barcode readers and scanners.

### Automatically route documents

Reduce the labour-intensive task of scanning several documents, saving and renaming them. Barcode Utility means that documents with a barcode can be scanned and automatically saved to the required location, automating the separation of a batch of documents and routing each individual file to the designated folder on your network.

## Security Solutions

### Secure Print Release

Secure Print+ enables you to print your confidential business documents securely. Your sensitive documents are only printed when you are ready to collect them from the printer. Only authorised staff can collect their documents and users are easily added and removed.

## Device Management

### Remote support

Remote Panel operates in real-time, offering a complete interactive interface to your printing device. Your IT provider can access the full functionality of your printer, to quickly diagnose and resolve any issues and enable settings to be changed as if they were physically standing at the printer.

### Automatic diagnostics

Request Help is a Brother service that enables your IT administrator or service provider to easily troubleshoot errors that may occur. You simply press the 'Request Help' icon on the control panel and a full diagnostic report is created and automatically emailed to your IT administrator.

### Order supplies from your printer

Effortlessly order your toner cartridge supplies directly from your printing device, with the Order Supplies service. In one touch, your selected supplier will be notified when you require replacement supplies and arrange delivery, ensuring you never run out of toner when you need it.

**KOFAX** 

**YSOFT**

You can also upgrade your devices with 3rd party solutions including integration with industry leading providers Kofax and YSoft - giving you complete flexibility in how you manage, secure and control your documents.

Brother solutions do not come as standard on all devices. For more information on how to access these solutions please contact your local dealer.

# Accessories

## Flexible and efficient

This professional mono laser range has been designed to seamlessly fit into your office space, whilst meeting the specific print requirements of your business.

Whether you need a mailbox to sort your printed documents or a staple finisher to automatically staple them together, your printer can be easily transformed to help improve business productivity.

Available for all models, optional paper trays are easily added, transforming your desktop device into a floor-standing printer, giving you the flexibility to increase the amount your business can print from the one device.

# Brother Original Accessories

Consommables originaux Brother

Genuine Brother Original supplies are made with you in mind. Not only to guarantee you effortless performance, and save you money in the long run, but also to protect your printer from potential long-term damage.

# Dedicated to remanufacturing and reducing CO2

Our processes mean that 100% of the Brother cartridges you send back to us are remanufactured or recycled. Absolutely nothing goes to landfill and hasn't since 2013.

We are regularly investing in more sustainable products by working towards the circular economy principles of reduce, reuse, refurbish, repair and recycle with zero waste to landfill.

Dedicated carbon neutral remanufacturing facilities support our free cartridge return and recycle scheme. Every year, we remanufacture or recycle 3 million toner cartridges.

By remanufacturing 86% of our toner cartridges and each cartridge saving on average 33% of CO2, we save around 4,500 tonnes of CO2 each year. In doing this, we are able to support your company in reducing its carbon footprint and can provide you with an annual certificate showing the amount of CO2 you have saved when returning cartridges via the bulk returns scheme.

Figures correct as of April 2022 - April 2023.

## Zero waste to landfill

Our European recycling facilities have been zero waste to landfill accredited since 2013 - stopping 1,500 tonnes of material from ending up in landfill every year.

# Our commitment to local communities

Our Vietnam manufacturing facilities received Responsible Business Alliance (RBA) Gold certification, for our commitment to fulfilling our social responsibilities through the establishment of sustainable supply chains.

RBA's code of conduct sets out standards to ensure that working conditions are safe, that workers are treated with respect and dignity, and that business operations are conducted environmentally responsibly and ethically.

**Responsible Business Alliance**

Affiliate Member

## COOL EARTH

As well as our market-leading, carbon-neutral toner remanufacturing program, we have been partners with global charity, Cool Earth for well over a decade. A UK-based non-profit organization, Cool Earth helps protect endangered rainforest, combats against climate change and provides employment for local people.

Together, we have supported 7 communities across Papua New Guinea and the Peruvian Amazon in protecting around 70,000 hectares of rainforest from deforestation. As custodians of this land, these local communities have kept almost 27 million trees standing which absorb and store over 38 million tonnes of CO2 from the earth's atmosphere.

### Protect

69,810

Hectares of rainforest

### Keep

26,807,633

Trees standing

### Store

38,415,672

Tonnes of carbon stores
