# PJ-700 Series

# PJ-700 Series A4 Mobile Printer Range

These compact mobile printers offer a durable 'in the field' mobile printing solution for sales/service, logistics and public safety/emergency services officials. Bluetooth, Wi-Fi and USB connections conveniently link to smartphones, tablets, PDA's and laptops.

- A4 sized printing in a compact design
- Fast print speed 8ppm
- High quality print resolution up to 300 dpi
- Direct thermal no ink or toner needed
- Powered by rechargeable batteries or AC adapter/vehicle power adapters
- Multiple connection methods available including Bluetooth, Wireless Direct, Wi-Fi and USB

# Why choose a mobile printer from Brother?

In the modern business climate, companies today are striving to differentiate themselves from the competition and are therefore investing in technologies which will increase worker productivity and improve customer satisfaction. Mobile printers are now being recognised as an integral part of the overall mobile mix, due to the many benefits they offer to field workers and their overall Return On Investment (ROI).

#### The benefits of printing on the move...

- Increased efficiency, freedom and mobility
- Reduced office administration costs
- Increased customer confidence with on-site printouts
- Greater accuracy reducing human error
- Valuable business tool for closing deals instantly

# Vertical markets & applications

#### Field Sales

Exceed customer expectations by using the PJ-700 series printer while on the move or on site. Busy field sales professionals are able to print whatever is required at the their customers' premises without having to communicate back to the office, giving them more time to visit other customers.

### **Field Service**

Mobile engineers are able to increase efficiency and accuracy by leaving hard copies of documents while on the move, and reduce the risk of any future queries.

## Logistics & Deliveries

Print a wide range of documents while on the road, in the truck or at your customer's premises. The fast print speed is ideal for busy delivery drivers with hectic schedules.

#### Invoices

- Order forms
- Delivery notes
- Stock data
- Guarantees

#### Applications:

- Citations & fines
- Patient reports
- Incident reports
- Warning notices

# **Emergency Services**

The PJ-700 series printers have become increasingly popular in the emergency services for a variety of applications. When used together with the vehicle mount & car charger, they have proved to be the perfect in-vehicle solution for the Police, Ambulance and Fire Services on a global scale. By printing medical documents and penalty fines on demand they can reduce the risk of clerical errors saving officers and medical staff valuable time.

# Applications:

- Invoices
- Service reports
- Quotations
- Parts & labour
- Diagnostics

# Invoices

Applications:

- Reports
- Quotations
- Contracts
- Terms & conditions
- Financial planning

# PJ-700 series In detail

# Thermal print technology

When investigating the options for mobile technology, key decision makers are increasingly considering thermal printers as the only true and reliable solution for field professionals. Printers using advanced direct thermal technology produce an image by heating specially coated thermal paper. When the paper passes over the thermal print head, the coating turns black in the areas where it is heated, producing an image. Thermal printing is increasingly considered by many as the only realistic solution for mobile applications for a number of reasons:

- Lets busy mobile workers to be able to focus on the job at hand without the inconvenience, or the added cost of purchasing ink, toner or ribbons.
- No downtime due to ink, toner or ribbons running out, and being unable to source replacements quickly.
- Enables the machine to be mounted however required, in any orientation, and can also be carried around without the risk of spillages, leaks and smudges.
- Less susceptibility to fluctuating seasonal temperatures and humidity extremes compared to other mobile technologies.

# Software support and features

Brother can provide the necessary tools required for software developers to integrate the print function into their mobile app. Printer drivers are available for Windows<sup>®</sup> OS, and Software Development Kits can be provided to support Apple iOS, Android and Windows<sup>®</sup> Mobile applications. To see more information visit: **www.brother.eu/developers** 

**Direct thermal printing** offers the most reliable technology for mobile printing solutions

Seamless connections with Bluetooth, Wi-Fi, USB and communications to other devices At just 26 cm wide and weighing approximately 480g (excluding battery), the PJ-700 series offers a true A4 mobile solution that fits easily into a briefcase or computer bag, and can be mounted in vehicles or other work areas. A4 size is considered ideal for printing documents where more detailed information is required, such as invoices, service reports and delivery notes. There is also a full range of accessories available, allowing the PJ-700 series to be fully customised as needed.

#### Further features include...

- Basic Imaging Protocol (BIP) support for downloading and printing JPEG files
- The ability to store document overlays in the printer to minimise data transfers
- Fully featured design software for creating & downloading the document overlays
- PJ ESC/P printer language offers compatibility with a variety of embedded systems

Choice of power options including Li-ion rechargeable battery, AC adapters or vehicle power kits

**Durable**, and dependable. The PJ-700 series has been designed for reliable printing in many environments

**Compact**, lightweight design for ultimate portability

**Use A4** cut sheet paper or continuous paper rolls. Simply tear the paper once printed
