Scan and manage your documents wherever you are

➡ In an increasingly digital world, we often choose to rely on the familiar format of a printed paper document, whether that is a contract, invoice, receipt or general office paperwork.

When documents start to pile up, it's a challenge to find what you need when you need it, or to make time to file them in the right location. Using the right technology means there is no need for a physical space for storage and removes those manual processes which can be both time consuming and come with a higher degree of error. and a less time-consuming task.

Mobile document scanners bring a new way of working. By turning paper documents in to digital files ensures your information is easier to find, safer and more convenient to edit and share.

Scan and go

Compact and portable document processing

Simplify the workflow

Ergonomically designed, they are not only practical, they're made to be used where it's most convenient to you. Scanning up to 15 pages per minute, and 2-sided with selected models, The dedicated internal rollers comfortably handle everything from standard A4 paper to ID embossed and business cards up to 1.24mm.

Convenient and versatile

The small footprint makes this range a perfect choice where space is a premium. Whether on a reception desk where space is limited or when you are out of the office, reducing the amount of paperwork and ensuring document security is always key.
