### IP filter

Restrict which network users can or cannot access the device over the network (IPv4)

### SecureBoot

The integrity of the firmware is checked before allowing any user interaction. Only genuine Brother firmware can be used

### Automatic intrusion detection

All Brother Print devices are secure by design. Devices automatically recognise security attacks and take preventative measures, including rebooting where necessary, to ensure the device remains secure

### Firmware updates

In addition to allowing automatic updates the printer can be set to not receive older firmware versions to avoid downgrade by an unauthorised user

### Firmware encryption

During update firmware is transferred over a trusted HTTPS encrypted connection

### Digitally-signed firmware

The firmware for Brother print and scan devices is digitally signed and secure

### Cloud secure print

Enables password protected driverless print job release

### Certificate management

Use the default standard self-signed, create a custom self-signed certificate, certificate signing request (CSR), or external public certificate & private key for protected network communication

### Port-based network access control

(IEEE 802.1x)  
Brother devices are in full compliance with this standard, to allow connection to an 802.1x EAP (Extensible Authentication Protocol) protected network

### Restrict network protocol

The Protocol Control feature allows an administrator to restrict communication protocols (e.g. FTP, Telnet) as required
